

b1
cont independent arcuate movement having a component at least in a substantially vertical plane when the rider is seated on the support portions and performing a pedalling motion.

b2
c 10. (Amended) The support system of claim ¹/~~2~~, wherein the support portions are ^{the} [cupped] cup shaped for receiving the ischial bone region and buttock region of a rider.

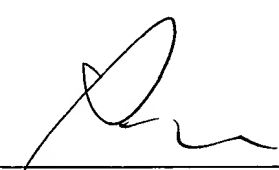

b3
20
20. (Amended) The bicycle seat of claim ¹⁸/~~24~~, wherein the spring is integral with the mounting rail and [be] is defined by a curved or bent portion of the mounting rail.

REMARKS

Applicants acknowledge the allowance of claims 20-25, 27, 28. The present amendment is believed to overcome the rejection of the remaining claims under 35 U.S.C. § 112, paragraph 2, and these claims are now believed in condition for allowance.

Respectfully submitted,

Date: Jan. 3, 2001
